Onboarding & education		9	5
Site building process		9	2
Overall pricing		9	?
Speed & security		9	7
Customization		10	5
Content management		5	4
Platform lock in		4	5

## Comments

weebly is very intuitive/ I do not like bootstrap

bootstrap is becoming an industry standard of sorts.

weebly is very user friendly

weebly builds in onboarding with little infor buttons built within their plaform

weebly is very user friendly/easy to work with

Weebly pro plan stays under \$7/month

Weebly has fast load speeds, optimized for own hosting, install/maintain SSL across site.

I feel bootstrap can make you lazy, can't customize styles/colors as much

Both content are not easily manageable

If you want to move your content somewhere else, migrating content & redirecting your URLS will be a

difficult process.
