

Tessa Genovese, CIS 255, Fall 2015  
Extra Credit Assignment 2

Important Property	Weebly	Bootstrap
Clear Instructions	8	5
Helpful User Interface	9	5
Functionality Provided	7	9
Ease of Making Changes	8	7
Ease of Performing Tasks to Develop Web Page	8	6
Ability to Carry Out Development As Preferred	6	8
Requires User to Know HTML	0	10
Requires User to Know CSS	0	8
Control Over the Look Of the Web Page	9	6

#### Comments

I found that Weebly almost walks you through some of the steps, while I had to figure out things by myself with Bootstrap.

I found Weebly's user interface to be very helpful and clear, while the code for Bootstrap was not always clear to me.

I felt that I could not do as much in Weebly as I could in Bootstrap, where I had control over the html and css myself.

I felt that it was easier to make changes in Weebly, as it automatically adjusted for those changes. Bootstrap was more difficult to make changes to, as I then had to adjust the layout myself.

I found that Weebly was easier to use when developing a web page, but Bootstrap took a little more work on my part to develop the webpage.

I found that it was harder for me to be creative in Weebly, while I felt that I could do whatever I wanted in Bootstrap because I had control over the source code.

If you don't know HTML, you can use Weebly. For Bootstrap, you have to have at least a basic knowledge of HTML.

If you don't know CSS, you can use Weebly. For Bootstrap, it pretty much requires you to have at least a basic knowledge of CSS.

I felt that I had more control over the final look of the webpage in Weebly than I did in Bootstrap because I could put elements any place I wanted to on the page, rather than working within grids.
